PROFESSIONAL EXPERIENCE

Turbo Labs, Inc. Fayetteville, Arkansas
Software Developer February 2025 - October 2025

- Contributed to multiple React + Supabase web applications for logistics, finance, and SaaS clients, using modern component systems and RESTful APIs.
- Developed core features for Gravitare — large-scale data tools for managing, matching, and reconciling invoices, bills of lading, and rate structures.
- Built complex UI patterns using React hooks, custom grids (Ag-Grid, Ant Design), and local state persistence, enabling real-time invoice manipulation and reconciliation workflows.
- Collaborated directly with client QA and product teams via Jira/Atlassian in an Agile environment — triaging bugs, planning sprints, and leading post-release fixes.
- Gained hands-on experience in frontend architecture, API integration, and component refactoring to maintain code quality across large React codebases.
- Supported additional projects including internal automation tools, AI-powered UI prototypes, and a financial dashboard built from scratch with Supabase, user auth, and responsive landing pages.
- Worked in an AI-assisted development environment (Cursor, Claude Code, Codex) to accelerate feature delivery while maintaining strong code comprehension and review practices.
